EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Robin Teskin on April 11, 2005.

The application has been amended as follows:

In Claim 19: Delete - - - [$G_{\alpha_{15}}$, $G_{\alpha_{16}}$] - - -.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: In a careful review of the prior art reveals that, until now, the functional coupling of T1R and T2R taste receptors and identifying compounds that modulate these have been through promiscuous G-proteins such as G_{15} . However, nowhere in the prior art has it been suggested or would it have been obvious to assay for compounds that modulate the pathway of G_i proteins to which T1R and T2R both functionally couple thereto. Thus the amendment to the claims limiting the assay methods specifically to G_i protein renders this invention novel and unobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
